

# BUCKLE UP

## It's the law.

**Washington law requires the use of a child car seat (or booster) until the age of 8 or 4'9" tall.**

Pediatrician, Dr. Beth Ebel  
Harborview Medical Center

### Children up to at least age one (20 lbs) ride in rear-facing car seats

Keep your child rear-facing as long as the car seat allows. Read the instructions to the car seat and your car. Never put an infant seat in front of an air bag.

### Children up to about age four (or 40 lbs) ride in forward-facing child car seats

Make sure they are installed tightly!

### Children up to 4'9" tall ride in booster seats with a lap and shoulder belt

Washington law requires the use of boosters up to age eight or 4'9" tall, whichever comes first. Safety experts recommend boosters until your child is 4'9" tall.

### Children up to age 13 ride in the back seat

Kids are safer in the back — research shows children in the front seat are about 40% more likely to be injured in a crash.

More info? Go to RCW 46.61.687 or [www.800buckleup.org](http://www.800buckleup.org). If you aren't sure if your child car seat is installed correctly, seek help by calling 1-800-Buck-L-Up.

# ABRÓCHESE.

## Es lay ley.
